Dear CinC enthusiast:

This year, the University of Zaragoza will be hosting the XL edition of the Computing in Cardiology conference from 22-25 September 2013. Computing in Cardiology provides an International forum for scientists and professionals from the fields of medicine, physics, engineering and computer science, and has been held annually since 1974. The main topics include Computerized ECG, Cardiovascular Imaging, Electrophysiology, Modeling & Simulation, Cardiovascular System, Cardiovascular Mechanics and Medical Informatics. The scientific sessions include oral and poster presentations.

Since this conference constitute a unique opportunity to gather specialists on technologies related to cardiology, and we believe that your company/institution can benefit from being present in this event, we would like to know if you would be interested on sponsoring this conference which represent an important event for industry, research and public organizations related to health care services in cardiology.

Sponsorship opportunities include:

- Names and logos of sponsors appearing in:
  - conference announcements
  - conference web site
  - conference abstract book distributed at the meeting
  - conference proceedings
- Brochures and other small items can be included in attendee kits
- Sponsorship of the Sunday symposium will be acknowledged
- During most meetings, exhibition space is available at the conference venue
- Open demos of products can be arranged during the Sunday symposium or during poster sessions

If you would like to have more detailed information regarding this event, please do no hesitate in contacting us. We would be happy to give a presentation with the information relative to this conference so that, you will be in a better position for considering sponsoring this conference. We are also open to discuss any additional sponsorship opportunities that may benefit your company/institution.

We also included the first announcement as a companion document to this letter.

Sincerely

Pablo Laguna
President of the Local organizing committee
